

DRAFT PROGRAM

Embolization in Women's Health Summit

Minimally invasive treatments are increasingly replacing invasive surgical procedures, which is certainly also reflected in Women's Health. Women are increasingly demanding the most elegant possible solution to their problem, a short-term, mild procedure with a quick recovery. Embolization meets this requirement.

Embolization as a treatment for abdominal complaints in women has proven to be a safe and effective treatment, but is nevertheless insufficiently known and insufficiently applied in many medical centers. The clinical success of embolization treatment is high in women with specific complaints due to uterine disease (fibroid and/or adenomyosis) and pathological para-uterine pelvic vasculature, like pelvic congestion syndrome (PCS). It therefore deserves extra attention.

Interventional radiology is the specialty par excellence, in which minimally invasive treatment through embolization is gaining ground compared to invasive surgical procedures. This should also apply to optimal personal patient care for women. The aim of the summit is to provide you a detailed overview of minimally invasive embolization treatment for uterine fibroids, adenomyosis, and PCS; the indications, the different approaches, techniques, available materials and clinical follow-up results.

DATE	START TIME	END TIME
2-Nov-24	8:30 AM CST	11:30 AM CST
COURSE DIRECTORS		
Dr. Marc Sapoval	Hôpital Européen Georges Pompidou (HEGP)	
Dr. Jafar Golzarian	Northstar Vascular & Interventional Univ of Minnesota	
Dr. Paul Lohle	Elisabeth TweeSteden Hospital	

AGENDA

Session 1: Fibroid and Adenomyosis	SPEAKER	START TIME	DURATION (MIN)
UAE for adenomyosis: how to adjust my technique	Man-Deuk Kim	8:30 AM	10
UAE for adenomyosis: long-term results (QUESTA trial)	Paul Lohle	8:40 AM	10
Resorbable particles in UFE - The Japanese experience	Dr. Keigo Osuga	8:50 AM	10
Can we use resorbable microspheres for UFE - The South Korean experience	Man-Deuk Kim	9:00 AM	10
Review of evidence for pregnancy after UFE	Dr Meriem Koual	9:10 AM	10
Post Partum Bleeding (PPB): How to quickly determine the proper treatment strategy and	Joo-Young Chun	9:20 AM	10
Session 1 Panel Discussion	All Physicians	9:30 AM	20
Industry Session	TBD	9:50 AM	10
Session 2: Pelvic Congestion Syndrome (PCS) and AVMs	SPEAKER	START TIME	DURATION (MIN)
Embolization for PCS; Anatomy, patient selection, and how to deal with May-Thurner and Nut-Cracker syndromes	Gloria Salazar	10:00 AM	10
Embolization for PCS: Coils, Glue, sclerosant, EVOH based agents: how to choose	Geert Maleaux	10:10 AM	10
Uterine AVMs how to classify, how to treat	Pierre-Antoine BARRAL	10:20 AM	10
Case 1 - Resorbables in South-Korea for UFE/ADM.	Man-Deuk Kim	10:30 AM	7
Case 2 - Post Partum Bleeding: A difficult and stressful case.	Joo-Young Chun	10:37 AM	7
Case 3 - PCS: How I do it in Egypt.	Rana Khafagy	10:44 AM	7
Case 4 - Challenging case of PCS embolisation.	Geert Maleux	10:51 AM	7
Case 5 - A complicated case of AVM embolisation.	Pierre-Antoine Barral	10:58 AM	7
Panel Discussion	All Physicians	11:05 AM	20
